

GEANT TRAINING

PROFILE

**Geant Training and Consulting
Center**

"geant training , in touch with tomorrow"

introduction

There was a time when economic growth, sustainability, and inclusion were seen as trade-offs, but today's leaders need to achieve all three. This new growth model will be more sustainable, and will lead to innovation while reducing environmental impact. It will also be more inclusive, providing access to opportunities for people all over the world. This is not an easy task, but our ambition is to help organizations and their leaders make it a reality. We combine bold strategies with transformative technologies to help organizations innovate more sustainably, achieve lasting performance gains, and build workforces that will thrive for this generation and the next.

What he knows about us:

The **Géant** Center is designed to operate as one partnership – one global partnership united by a strong set of values, including a deep commitment to diversity, and creating a positive social impact through our work and **the way we manage our company**.

We take a consistent approach to recruitment and skills development no matter where our people are located, so we can quickly deliver the right team, with the right experience and expertise, to every client anywhere in the world. Our consultants include doctors, engineers, designers, data scientists, business managers, civil servants, entrepreneurs and research scientists. They join **Geant** Center to have the opportunity to apply their talents to complex and important challenges

Speech of the General Manager

The management of **the Geant Training and Consulting Center** seeks to provide distinguished services in the field of training and consulting by harnessing All material and human capabilities to achieve smart and effective training to develop human resources as it is one of the tributaries of sustainable development. As training is a strategic option for any entity looking to prepare human cadres capable of meeting the needs of the labor market and keeping up with

The rapid developments and changes that occur in the fields of work, and it is considered supportive and supportive of the capabilities of employees, which ensures them Compatibility with these changes. In carrying out its mission, **the Geant Training and Consulting Center** relies on the principle of forming an ongoing, fruitful relationship with governmental and private institutions and bodies, and building bridges of communication inside and outside the State of Egypt, to establish the elements of success for the trainees. It seeks to enable them to achieve integration of experience, integration of knowledge, and integration of personality by enhancing the knowledge they receive theoretically, linking it to practical reality, and qualifying them to have bright roles in their work and life that are compatible with their practical and scientific experiences. To participate in shaping the nation's future is a responsibility that requires hard work, commitment, and creativity from everyone.

Public relations, media and journalism

Public relations is one of the administrative functions that contribute to enhancing communication with customers, and linking the nature of the establishment's work with public opinions. Media is a group of communication channels used to disseminate news, promotional advertisements, or data. The media is known as the main social means of communicating with the masses. Journalism The word journalism has been defined linguistically in more than one dictionary. It was stated in the comprehensive dictionary of meanings that **journalism: (the profession of one who collects news and opinions and publishes them in a newspaper or magazine)**

Insurance and statistics

Insurance is a means that most people rely on to mitigate risks beyond their control and mitigate their effects to which they may be exposed. These risks include what may threaten their lives, their property, their businesses, and many others, as the insured pays a monthly subscription to the insurer (in Mostly the insurance company), and all the insurers' money is paid to anyone who is exposed to an accident beyond his control to compensate for his losses,

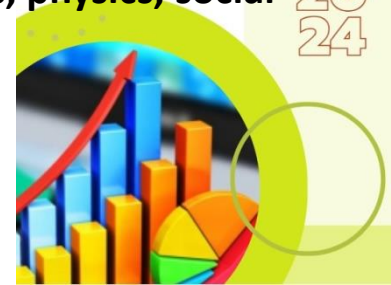

and this is what insurance companies are based on today.

Statistics is a science that collects data and then summarizes and represents it. To reach and find conclusions, through the availability of a large amount of data. Statistics can be classified as one of the branches of mathematics. It has great applied importance and is included in the fields of various sciences, physics, social sciences, politics, and business.
